

Autumn Term 2023

This has been a very busy half term in Year 6! In English, we have been studying *Holes* and writing a retell of the story as the main character, Stanley. We have also created a persuasive double page spread about Camp Green Lake, the fictional work camp where the story takes place.

In Maths we have been learning about place value and the four operations and practising written methods. We have had a look at some SATs questions too!

In RE we have been learning about home and family and how we can show unconditional love to each other. We answered the question - Do you have to earn love?

In History we have been learning about conflict through time. We have investigated conflict, tools and weapons in the Stone Age through to the Iron Age. We have also compared the Greeks and Romans as warriors.

In Geography we have been learning about Biomes, the layers of the rainforest and plant and animal adaptation. We even designed our own animal to suit a particular environment.

In computer science we have been investigating coding. We are creating a catching game using Scratch and have investigated input events and repetition and loops.

In PE we have been learning tag rugby and have taken part in dodgeball and cross-country running competitions.

We prepared a liturgical prayer for parents with our Reception buddies.
